

TEMPTATION TOKEN

\$TTS

Enticement Paper v2.0

Unleash Your Desires

A Deflationary Crypto-Powered Voting Game on Base Blockchain

Network	Base Blockchain — Coinbase Layer 2 (Chain ID: 8453)
Contract	0x5570eA97d53A53170e973894A9Fa7feb5785d3b9
Total Supply	69,000,000,000 TTS
Launch Price	\$0.01 per TTS
4-Month Target	\$0.10 per TTS (10x from launch)
1-Year Target	\$1.00 per TTS (100x from launch)
Auditor	Solidproof.io — Smart Contract Security (Germany)
Liquidity Lock	12 Months — Team.Finance — Until April 2, 2027
Issuer	Blockchain Entertainment LLC
Version	Enticement Paper v2.0 — April 2026

1. Introduction

Temptation Token (\$TTS) is a deflationary, utility-driven cryptocurrency built on Base — Coinbase's Layer 2 Ethereum network. First conceptualized in 2024 and fully deployed on Base mainnet in 2026, \$TTS powers a weekly photo voting competition where players stake real tokens to win real prizes, in real time, on a publicly verifiable blockchain.

Unlike the overwhelming majority of speculative tokens with no utility and no product, every \$TTS token has a defined, immediate purpose: voting in weekly competitions, staking for yield and competitive advantage, paying submission fees, and accessing VIP content tiers. Most critically — losing votes are permanently burned. Every round played reduces total supply, creating a deflationary engine driven by genuine player engagement.

Blockchain Entertainment LLC is the issuing entity behind Temptation Token — a company founded by a team of credentialed health, performance, and media professionals who bring real-world business infrastructure to a Web3 entertainment product.

2. Vision

Temptation Token is built on a simple but powerful insight: human beings are wired for competition, desire, and reward. Every major entertainment platform — from reality TV to Instagram to OnlyFans — is built on this psychological truth. Temptation Token is the first platform to put real economic stakes on that competition, on-chain, transparently, and with built-in charitable impact.

Our mission delivers on five pillars:

- A provably fair, on-chain voting game with real weekly cash payouts to real people
- A deflationary token economy where player engagement directly drives value creation
- Automatic charitable giving — 10% of every prize pool funds anti-trafficking work
- Equal economic reward for content creators and engaged fans
- A scalable Web3 gaming ecosystem expanding to mobile, Telegram, and beyond

3. How the Game Works

3.1 Weekly Voting Rounds

Each week, approved photo profiles compete in the Temptation Token arena. Players vote by spending \$TTS tokens on their favorite profile. Votes are not guaranteed wins — they purchase weighted lottery tickets for the end-of-round Chainlink VRF draw. More votes equal better odds, but any profile can win. This creates genuine tension, genuine competition, and genuine engagement that keeps players coming back every single week.

3.2 Provably Fair Settlement via Chainlink VRF

The winning profile is selected via Chainlink VRF — Verifiable Random Function — the gold standard for on-chain randomness. No human intervention. No manipulation. Every settlement is verifiable on Base by anyone, anywhere, at any time.

3.3 Prize Distribution

Recipient	Share	Description
Top Voter	40%	Highest TTS voter on the winning profile wins 40% of the total pool
Winning Profile	40%	The profile selected by the VRF weighted draw receives 40%
Platform Treasury	10%	Funds ongoing development, operations, and team
Polaris Project	10%	Donated automatically to anti-human trafficking nonprofit (501c3)

3.4 The Deflationary Burn

All losing votes are permanently burned — removed from total \$TTS supply. As player volume grows, weekly burns accelerate. More players means more votes. More votes means more burns. More burns means less supply. Less supply means higher price per token. The game mechanics and the token economics are perfectly aligned — every player who engages creates value for every token holder.

3.5 Guaranteed Participation Rewards

Any approved profile receiving 100+ votes in a given week earns a guaranteed minimum payout of 50 TTS regardless of round outcome. Posting is never zero-sum.

3.6 Dark Horse Bonus

If the winning profile was not leading at the midweek checkpoint, the top voter on that profile earns a 1.5x multiplier on their payout. This rewards strategic thinking and maintains voter engagement throughout the entire week.

3.7 Profile Submission Tiers

Tier	Entry Cost	Placement	Perks
Standard	100 TTS	Queue order	Basic listing in weekly round
Featured	500 TTS	Priority placement	Highlighted border in carousel
Spotlight	1,000 TTS	Top of carousel	Premium badge and social promotion

4. Staking & VIP Tiers

Holders who stake \$TTS earn passive APR and gain vote multipliers that amplify their competitive edge in weekly rounds. Staking rewards long-term commitment while reducing circulating supply — a dual benefit for individual holders and the entire ecosystem.

Tier	Stake Required	APR	Vote Multiplier
Bronze	1,000 TTS	5%	1.1x
Silver	10,000 TTS	10%	1.25x
Gold	50,000 TTS	20%	1.5x
Platinum	100,000 TTS	30%	2.0x
Diamond	500,000 TTS	45%	3.0x

5. Tokenomics

69,000,000,000 \$TTS exists at launch. Supply is strictly deflationary from this point forward — every weekly round burns losing votes permanently, reducing circulating supply with every game played.

Wallet	Amount	Purpose
Founder	10B TTS	Long-term founder allocation
Investor Reserve	10B TTS	Current and future funding rounds
Treasury	20B TTS	Platform operations and growth
Staking Rewards	10B TTS	Player staking incentive pool
Marketing	5B TTS	Club deals, influencer partnerships
Development	5B TTS	App development and contract upgrades
Ecosystem	5B TTS	Integrations, partnerships, expansion
Charitable	2B TTS	Polaris Project and aligned causes
Team	2B TTS	Future team compensation
Signup Bonus	10M TTS	New user onboarding — \$5 equivalent at signup

A 1% transfer tax applies to all \$TTS transactions. The Uniswap V2 liquidity pool and all platform smart contracts are permanently tax-exempt. Initial liquidity of 0.5 ETH + 107,000 TTS is locked for 12 months on

Team.Finance — verifiable on-chain by anyone at any time. This cannot be undone until April 2, 2027.

6. Technical Infrastructure

6.1 Why Base Blockchain

Base is Coinbase's Layer 2 Ethereum network — sub-cent fees, 2-second finality, full Ethereum security. Base is the fastest-growing L2 in crypto and is natively integrated with Coinbase — the largest US exchange with over 100 million verified users.

6.2 Deployed Smart Contracts (All Verified on BaseScan)

Contract	Address	Function
TTS Token	0x5570eA97d...5d3b9	ERC-20 with 1% tax, UUPS upgradeable proxy
TTSVoting	0x08CEDe65e...Eb2D	Weekly round management, vote tracking, settlement
TTSStaking	0xA12B889E...30fc	Staking pools with APR tiers and vote multipliers
TTS Airdrop	0x214f482ae...f0f	Signup bonuses and promotional distributions
TTSWinnerNFT	0x8b1EFa595...91f	Unique NFT minting for winners and top voters

6.3 Security, Audit & False Positive Removal

All contracts are open-source and verified on BaseScan. A full security audit is being conducted by Solidproof.io. The audit produces a public report, a security certification badge, and listing on Solidproof's TrustNet. A formal false-positive report has been submitted to Blockaid to remove the MetaMask security flag — triggered solely by the documented 1% transfer tax, not by any malicious code.

6.4 Application Stack

- Frontend: React.js — Vercel CDN, globally distributed, zero-downtime
- Database: Supabase Pro — always-on PostgreSQL with real-time subscriptions
- Wallets: WalletConnect v2 — MetaMask, Coinbase Wallet, Trust Wallet
- AI: Claude-powered chatbot on app and main website
- Telegram: @TTSGameBot — referral links, VIP access, leaderboard, game entry
- Randomness: Chainlink VRF v2 — provably fair winner selection
- DEX: Uniswap V2 on Base — fee-on-transfer compatible

7. Charitable Integration — The Polaris Project

10% of every weekly prize pool is donated to The Polaris Project — a 501(c)3 nonprofit that disrupts human trafficking networks and restores survivors. This is hardcoded into the smart contract and executes automatically with every round settlement. Players can verify every charitable transfer on BaseScan in real time.

Polaris Project Wallet: 0xf7dd429d679cb61231e73785fd1737e60138aba3

8. Roadmap

Phase	Timeline	Milestones
Phase 1 ■ Complete	Q1 2026	Base mainnet deployment (5 contracts verified) • Uniswap V2 liquidity live LP locked 12 months on Team.Finance • Web app live at app.temptationtoken.io Telegram bot live • DexScreener listed • Solidproof audit in progress
Phase 2 ■ Active	Q2 2026	CoinGecko Active Listing • Chainlink VRF integration • TTSVoting v2 Club partnership outreach • Influencer referral program • \$100K liquidity raise CoinMarketCap listing • Trust Wallet logo approved
Phase 3	Q3 2026	iOS and Android apps via Expo • Telegram Mini App First venue partnerships live • 10,000+ active weekly players milestone
Phase 4	Q4 2026	Sports prediction markets (MMA, boxing) • NFT marketplace Cross-platform creator economy • Major exchange listings
Phase 5	2027+	Metaverse integration • DeFi yield products Global club network • \$1.00 TTS price target

9. Price Path & Investor Opportunity

Early investors entering at \$0.01 have a mechanics-driven path to 100x. The deflationary burn ensures that as player volume grows, supply shrinks — creating upward price pressure independent of new liquidity. Every player who votes is reducing supply. This is a self-reinforcing economic flywheel.

Milestone	Price	Liquidity Target	Primary Driver
Launch (Now)	\$0.01	\$1,000	Initial pool — entry point
4-Month Target	\$0.10	\$100,000	Liquidity raise + active player base
12-Month Target	\$0.50	\$500,000	Exchange listings + mobile apps
2027 Target	\$1.00	\$1M+	Mainstream adoption + sustained burn

Investors entering at \$0.001 in the private round see a 10x to current launch price. A path to \$0.10 represents 100x from private sale. A path to \$1.00 represents 1,000x. These projections are based on supply mechanics, liquidity depth requirements, and comparable gaming token trajectories.

10. The Team

Jim Goetz

Founder & Chief Executive — Blockchain Entertainment LLC

There are founders who talk about disruption. And then there are founders who have spent decades in the rooms where performance actually happens — where outcomes are measured in milliseconds, in championships, in human lives changed. Jim Goetz is the latter.

Jim's career as a professional strength and conditioning coach spans elite athletics at every level. He has worked directly with the Toronto Blue Jays, the Tampa Bay Buccaneers, the Bridgeport Bluefish, the Tampa Bay Storm, and the University of South Florida Football program — alongside numerous Olympic and professional athletes who demanded the absolute highest standard of performance science. In environments where fractions of a percent separate champions from everyone else, Jim was the person they trusted.

His credentials include the Certified Strength and Conditioning Specialist (CSCS) designation from the National Strength and Conditioning Association and the National Board of Chiropractic Examiners (NBCE) — a rare combination that bridges evidence-based sports science with clinical expertise.

In 2018, Jim founded Functionised — an integrative wellness and human performance company operating under the brands FIT Clinic, FIT Stretch, and FIT Lab. With locations in Colts Neck and Tinton Falls, New Jersey, and two additional locations in active development, Functionised has become one of the most respected human optimization platforms in the region.

Jim is a published author of multiple works that have reached national audiences. His co-authored book '600 Burgers in 30 Days' became a number one Amazon Best Seller. He was co-director and co-star of The Keto Project Movie, available on Amazon. His book 'BioHacking the Brain for Success' was published in 2017 and has been cited in academic and coaching circles as a practical framework for high performance mindset development. His academic contributions include publications in The American Chiropractor and multiple research platforms.

Jim brings to Temptation Token something rare in the Web3 space: a deep understanding of human psychology, an elite performance mindset, and a proven track record of building real businesses that scale. He is not a crypto native who stumbled into entertainment. He is a seasoned operator who recognized that the convergence of blockchain technology, gaming psychology, and adult entertainment represents one of the most significant untapped market opportunities of this decade — and built the infrastructure to capture it.

"The same principles that separate elite athletes from everyone else — discipline, systems, relentless optimization, and the willingness to do what others won't — are exactly what separate successful projects from the noise in Web3."

Dr. Michael Brandon, DC

Medical Advisor, Co-Author & Paid Crypto Content Creator — Fighting Crypto

Dr. Michael Brandon is one of those rare professionals who exists at the intersection of rigorous clinical science and genuine popular appeal. A Doctor of Chiropractic with over a decade of practice, a published author, a filmmaker, and now a paid YouTube creator in the cryptocurrency space — Dr. Brandon's profile is uniquely positioned to bridge the gap between the mainstream audience Temptation Token is targeting and the blockchain infrastructure it is built on.

As the clinical lead at FIT Clinic — the chiropractic division of Functionised — Dr. Brandon has built a reputation across Monmouth County and New Jersey as a physician who does not simply treat symptoms but identifies root causes. His work with competitive athletes, including those training at the CrossFit and Spartan Race level, has earned him patient testimonials that speak to outcomes most practitioners never achieve.

His published work includes 'Dr. Mike's Eating for a High Performance Lifestyle' — a nutritional framework co-authored with Jim Goetz. In '600 Burgers in 30 Days,' Dr. Brandon became the subject of one of the most compelling health experiments in recent publishing — consuming 600 burgers in 30 days to document the physiological consequences of an inferior diet. The resulting book became a number one Amazon Best Seller. The companion film, The Keto Project Movie, is available on Amazon.

Dr. Brandon is now a paid content creator on the Fighting Crypto YouTube channel (youtube.com/@Fighting_Crypto) — a platform dedicated to cryptocurrency education, market analysis, and Web3 project discovery. His presence in this space is not peripheral. He is actively producing content that reaches a crypto-native audience and building a following that trusts his analysis. For Temptation Token, this is an invaluable asset: a credentialed medical professional and published author who can speak authentically to both the wellness community and the crypto investment community — a combination almost no other project can claim.

The strategic value Dr. Brandon brings extends beyond his resume. He represents the type of advisor that institutional investors and sophisticated angels specifically seek — someone with real credentials in a non-crypto field who has independently chosen to enter the Web3 space and stake his professional reputation on a specific project.

"Credibility in this space comes from building things that work in the real world first. The blockchain is just the infrastructure. The human element is what makes it matter."
